

# PROVIABLE®

## FIBER SUPPLEMENT

**INTRODUCING**

**Provable® Fiber contains NMXFBR5™, a proprietary 5-in-1 fiber blend of microcrystalline cellulose, apple fiber, psyllium husk, beta-glucans, and gum arabic. This unique blend utilizes soluble and insoluble fibers to provide viscous and fermentable properties to support a healthy digestive system.**

*“The effect of fiber sources is dependent on their concentration and functional properties; solubility, viscosity, and fermentability. A mixed supplement can provide balanced fiber benefits to pets for a variety of situations.”*

— Katie Tolbert, DVM, Ph.D., DACVIM (SAIM, Nutrition)

**FOR  
DOGS  
& CATS**

# FIBER SUPPORTS NORMAL STOOL CONSISTENCY & FREQUENCY

## Administration & Ingredients

### Guaranteed Analysis\*

#### Per 2.6 grams (teaspoon)

Total Dietary Fiber (TDF), max . . . . .85% / 2210 mg

(a proprietary blend NMXFBR5™: microcrystalline cellulose, apple fiber, psyllium husk fiber, yeast extract<sup>▼</sup>, and gum arabic)

Insoluble Dietary Fiber (IDF), max . . . . .57% / 1482 mg

Soluble Dietary Fiber (SDF), max . . . . .28% / 728 mg

\*Please see product label for complete information.

▼Source of beta (1,3/1,6) glucan.

### For Dogs

½ teaspoon<sup>†</sup> per 20 pounds body weight twice daily.<sup>▲</sup>

Mix with food.

### For Cats

⅛ teaspoon<sup>†</sup> twice daily.<sup>▲</sup>

Mix with food.

<sup>†</sup>Each teaspoon is approximately 2.6 grams fiber. Teaspoon not included.

<sup>▲</sup>Starting recommendation. If an increase is necessary, double initial amount.

### 5-in-1 proprietary fiber blend

Provides viscous and fermentable properties

### Balanced fiber benefits

Supports GI health

### Binds & absorbs

Provable<sup>®</sup> Fiber has the ability to bind greater than **10x** its weight in water

Fiber supplementation should be done gradually over a period of 5–7 days, and pet owners can monitor changes to their pet's fecal quality. The amount of fiber supplement administered may be increased or decreased at your discretion in response to fecal quality. Increased fecal frequency and volume may occur with increased fiber intake.
