MAXI/GUARD[®]

MAXI/GUARD[®] Oral Cleansing Wipes

MAXI/GUARD Oral Wipes are both an effective pet oral care product and applicator all in one. Cleansing the oral cavity of pets is much faster and easier since the wipes are infused with our unique zinc formulation. This taste free compound neutralizes offensive mouth odors, helps reduce the deposition of plaque and aids in gingival inflammation. The wipes are textured to assist in the mechanical removal of plaque, but not so rough to cause damage to the gum tissue. MAXI/GUARD Oral Wipes increase owner compliance and pet acceptance.

Home Care Use: MAXI/GUARD Oral Wipes are ideal for controlling halitosis and reducing the deposition of plaque on pets that may not readily accept a toothbrush or for pet owners that have struggled with consistent application of an oral care product. It is perfect for maintaining oral health and for extending the time between professional dental cleanings.

In-Clinic Use: MAXI/GUARD Oral Wipes can be used as a great educational tool in the exam room. When you are explaining to pet owners the importance of routine dental cleanings and why they should be using a high-quality home care product, take a MAXI/GUARD Oral Wipe and show them how easy it is to use on their pet. Then show them the residue on the wipe. MAXI/GUARD Oral Wipes do a fantastic job of removing and collecting plaque. Your clients will be amazed at the amount of oral debris that was present in their pet's mouth. This makes your job as an educator much easier.

MAXI/GUARD[®] Oral Cleansing Gel

MAXI/GUARD Oral Gel has a long history of being the most complete home dental care product available. The unique zinc ascorbate formulation is very effective in helping reduce gingival inflammation, reducing the deposition of plaque and neutralizing offensive mouth odors. It is considered our "professional strength" product and is very concentrated. MAXI/GUARD Oral Gel is recommended for severe oral problems such as advanced periodontal cases, post oral surgery and pre and post prophylaxis.

MAXI/GUARD[®] OraZn[®]

MAXI/GUARD OraZn utilizes a taste-free, neutralized zinc formulation that is acceptable to even the most challenging cases such as cats and small dogs. OraZn also helps reduce the deposition of plaque, aids in the reduction of gingival inflammation and neutralizes offensive mouth odors. The product is very effective in maintaining oral health after a dental prophylaxis.
