**ElleVet.**  
SCIENCES

Enhanced with  
CBG to support  
oral health

Parsley and  
peppermint for  
fresh breath

Star-shaped  
stick to support  
clean teeth

**We are thrilled to share our new CBG Dental Sticks – the first and only canine dental sticks to incorporate CBG (cannabigerol), a natural compound with powerful oral health benefits.**

Oral care is critical for overall canine wellness. ElleVet's new CBG Dental Sticks provide your patients with a science-backed, safe, effective option for dental support. CBG supports a healthy balance of bacteria in the mouth, making it a powerful ingredient to support canine dental health at any age. ElleVet's CBG Dental Sticks include parsley and peppermint for fresh breath and are formulated in the shape of a star to scrape the surface of the teeth clean of plaque and tartar as dogs chew.
