***IMPORTANT SAFETY INFORMATION:** Not for use in horses intended for food. There are no known contraindications to this drug when used as directed. Do not use in horses showing hypersensitivity to flunixin meglumine. The effect of BANAMINE® (flunixin meglumine paste) on pregnancy has not been determined. Concomitant use of BANAMINE® (flunixin meglumine paste) with other anti-inflammatory drugs such as NSAIDs and corticosteroids should be avoided or closely monitored.

Must have an appropriate veterinarian/client/patient relationship: 1) the veterinarian has assumed responsibility for making medical judgments regarding the health of the animal(s) and the need for medical treatment, and the client (owner or caretaker) has agreed to follow the instructions of the veterinarian; and when 2) there is sufficient knowledge of the animal(s) by the veterinarian to initiate at least a general or preliminary diagnosis of the medical condition of the animal(s). This means that the veterinarian has recently seen and is personally acquainted with the keeping and care of the animal(s), and/or by medically appropriate and timely visits to the premises where the animals are kept; and when 3) the practicing veterinarian is readily available for follow-up in case of adverse reactions or failure of the regimen of therapy.
